

you people need to take the time & money that you are wasting on this issue & spend more time & money on why we are getting taken to the cleaners on fuel prices, homeland security, stop having the American people pay for having you people looking under rocks that don't matter to are Nation, so they want to broadcast the weather & traffic reports is this worth spending money on the FCC to conduct hearings on spend the money you would use for the hearings wisely, give it to the poor here in the U.S. not the people in some other country. john c jensen
